

Abdulrahim Terro

BACKEND DEVELOPER

📍 UAE, Abu Dhabi, Al Nahyan 📞 +971 50 5969746 ✉️ abdulrahim.terro@gmail.com

Short Brief:

I'm backend developer, with expertise in developing server-side applications using Node.js, Express, Mongoose, Sequelize, Stripe, and Git.

I have a Bachelor's degree in Information Technology from AUST.

I am a quick learner with excellent problem-solving skills, and I enjoy working in a team environment. fluent in English and Arabic.

INFORMATION:

- Nationality: Syrian
- Gender: Male: Male
- Date of birth: 1TH Jun 1996
- Marital Status: Single
- Language: Arabic / English

SUMMARY:

As a highly motivated and skilled backend developer, I am seeking a challenging role in a dynamic environment where I can utilize my technical expertise and knowledge to develop and implement innovative solutions. My aim is to leverage my skills and knowledge to create efficient and scalable server-side applications that fulfill the business requirements of my clients. Additionally, I am committed to continuously enhancing my skills and knowledge in the field of backend development by staying up-to-date with the latest technologies and best practices.

Moreover, I am dedicated to collaborating with other developers and stakeholders to produce high-quality software that delivers value to end-users. With my passion for backend development, I am confident in my ability to excel in any role that requires my skills and knowledge.

Technical SKILLS:

- Node.js
- Express
- Mongoose
- Sequelize
- Stripe
- Git
- RestAPI

HARD SKILLS:

- Database Management: Knowledge of database management systems (DBMS) such as MySQL, MongoDB, Oracle, and PostgreSQL, and the ability to design and implement database schemas, create efficient queries, and ensure data security.
- Web Servers: Familiarity with web server technologies such as Apache, Nginx, and IIS, and the ability to configure and deploy web applications on these servers.
- DevOps: Understanding of DevOps principles and experience with containerization tools such as Docker, container orchestration platforms such as Kubernetes, and cloud services such as AWS, Azure, and Google Cloud Platform
- Testing: Knowledge of testing frameworks such as Mocha, Chai, and Jest, and experience with unit testing, integration testing, and end-to-end testing.
- Security: Awareness of security best practices and the ability to implement security measures such as encryption, authentication, and access control.
- Version Control: Familiarity with version control systems such as Git and the ability to collaborate with other developers using these tools.
- Agile Methodologies: Understanding of agile development methodologies such as Scrum and Kanban, and experience working in agile teams.
- Continuous Integration and Deployment: Knowledge of continuous integration and deployment (CI/CD) tools such as Jenkins and CircleCI, and experience with automated testing, builds, and deployments.
- Microservices: Familiarity with microservices architecture and the ability to design, develop, and deploy microservices-based applications.
- APIs: Knowledge of API design and development, and experience with building RESTful APIs and integrating with third-party APIs.
- Performance Optimization: Ability to optimize the performance of server-side applications by identifying and resolving bottlenecks and implementing caching strategies.
- Monitoring and Logging: Understanding of monitoring and logging tools such as Prometheus and ELK stack, and the ability to monitor the health of server-side applications and troubleshoot issues.

WORK EXPERIENCE:

Back-end Developer

Future Vision for Computer System and Network

Abu Dhabi , UAE

10/2021 – Present

Achievements/Task

- Developing and maintaining RESTful APIs using Node.js, Express and MongoDB
- Designing and implementing database schemas using Mongoose and Sequelize
- Creating efficient and optimized database queries
- Collaborating with front-end developers to implement new features and functionalities

Web Back-end Developer

Unifi Solutions

Remote

6/2021 – 10/2021

Achievements/Task

- Developed scalable and efficient server-side applications using Node.js and Express
- Integrated Stripe payment gateway for e-commerce applications
- Implemented security features such as user authentication and authorization
- Collaborated with front-end developers to create seamless user experiences

Internship Back-end Developer Trainee

BZNS Monster

Remote

2/2021 – 5/2021

Achievements/Task

- Developed and maintained RESTful APIs using Node.js, Express and MongoDB
- Worked with a team of developers to create and implement new features and functionalities Implemented security features such as user authentication and authorization
- Conducted testing and debugging to ensure high-quality code
- Assisted in the development of front-end applications using React

EDUCATION:

IT Engineering

Arab University For Science And Technology

2016 – 2021
